

Unika Paints Pretty

NuTecSol

ACRYLIC DISTEMPER.

Unika Paints Pretty Acrylic Distemper is a water based, interior wall paint. It is the best quality acrylic distemper which gives the walls a delightful, attractive, matt finish that lasts for ages.

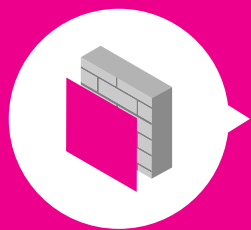

BENEFITS:

- **Finish:** Unika Paints Acrylic Distemper - Pretty gives unmatched durability and a smooth finish that has no equal in the distemper category
- **Acrylic Co-polymer:** It is a time-tested formulation with acrylic co-polymer binder that gives it this unparalleled performance
- **Colour:** It is available in a wide range of bright and attractive shades

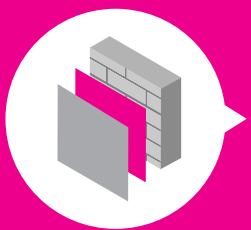

COVERAGE

On normal masonry surface after brushing

100 - 130 sq.ft/kg**

55 - 65 sq.ft/kg**

**Actual coverage may vary from the quoted coverage due to factors such as method and condition of application and surface roughness and porosity.

HOW TO APPLY

PLASTER new masonry surfaces must be allowed to cure completely for best results. It is recommended to allow 28 days as curing time for new masonry surfaces

CLEANING Ensure that surface is completely free from all dirt, loosely held plaster, powdery residue, oil, grease or any other contamination. Any previous growth of fungus, algae moss needs to be removed thoroughly by vigorous wire brushing and cleaning with water.

FILLING FOR CRACKS For filling cracks up to 3mm use NuTec Crack Fill

PRE WETTING Pre wet the surface with water before application of 1st coat of SNOWSIL

Apply Platin - Cement primer through brush/roller/spray

Apply Pretty - An acrylic distemper by using brush/roller/spray
